ELAN Network Members  
in Costa Rica

This project is financed by the European Union

The event will enable attendees to find new international partners and to create strong solid and long-term networks that will let them generate technology based business opportunities on innovation.

Nano/biotechnology, ICTs and renewable/alternative energies are considered the door to new global market trends and Costa Rica has developed a solid infrastructure, which allows its companies to generate Business Opportunities based In Technology, not only internally, but also as the best partners to develop business with companies from other regions.

### Attendees from LAC and EU

- Enterprises, specially SMEs.
- Entrepreneurs.
- Technological development centres.
- Government entities.
- Business associations and clusters from Europe and Latin America.

### Objectives

- Identify business opportunities and technological challenges.
- Consolidate areas of collaboration in the development of business opportunities based on technology.
- Create a space where participants seek the right partners to address market challenges in generating new jobs, diversification of existing businesses or to address new markets.
- Provide a forum for the government, academia and business sectors to discuss the challenges and opportunities of bringing innovations to the market and the most suitable strategies to overcome them.

The event will be coordinated with the International Fair [EXPOPYME 2017](#)

In cooperation with
